

C Series by Model

Inspired by materials formed over time by the sea and the wind, this collection reflects the colours of nature. Combining simplicity with purity, C by Model will allow those seeking tranquility and exclusivity to find themselves in the midst of new and unlimited horizons.

Influenced by the aura of Provence and the Mediterranean, a C by Model floor is a perfect match for natural tissues like linen, cotton or hemp, for neutral-coloured walls and for bright accessories. Through light, C by Model reproduces in infinite detail the many colours in the prism of life. Opening a window to the sea or a breeze-swept field, or perhaps a courtyard family dinner, C by Model creates an aura where time and space become a rare and precious memento, far from the noise of the city.

Mykonos

This is the bluest of blues, suggesting the sea in autumn, fishing boats, languishing on the beach under a colourful parasol. Mykonos will highlight the pure white brilliance for which the island is renowned. Open windows, drapes fluttering in the breeze, salty air: this is the ambiance the romantic adventurer will find in the C by Model Mykonos series.

Aix

Seeing with your nose, smelling with your fingers, tasting with your eyes: this reversal of roles cleverly suggests the rich landscape of the region. The C by Model Aix choice epitomizes the fertility of the soil. Your sensitivities will awaken to the scent of lavender, ripe fruit and green herbs. Contrasting accessories in a monochromatic setting will reflect your innermost inspirations.

Andalucia

This tint was born of the overwhelming olive gardens in the region, and will leave no one unmoved. Its great richness is a result of a combination of the colours of the sun and the sea, creating an attractive and comforting softness reflecting the benefits of the ubiquitous olive. Andalucia sets the tone for lovers of the environment, allowing a fusion of warm earth tones with comforting colours. Leather and cloth-covered furniture will reflect the evocative floral colours of the region. Endless summer evenings filled with music... memories of Andalucia.

Venetia

The C by Model collection would not be complete without this rich and powerful colour for the passionate and dedicated among you. Venetia will harmonize with a warm setting where the most precious objects will be seen in a new light. This décor allows your imagination to run wild. Like vintage wine improving with age, Venetia flooring provides an ideal setting for your precious objects to age with distinction.

Valencia

Imagine vast Iberian plains and countless orange blossoms by the Mediterranean Sea: this inspired our Valencia line. Sun-drenched orange tones harmonize with luminous colour combinations to add life to your décor.

Cannes

This star-studded city evokes splashes of colour under a noonday sun in a bustling harbour of glamorous yachts and beautiful people. Choosing this flooring reflects your unique warmth, passion and spirit of adventure. Your harvest-tone décor punctuated with primary colours will be sensational!
